

Orthopaedics, Neurology & Cardiology Price Guide | October 2023

All surgical estimates include the initial consultation, imaging of one region and hospitalisation based on the average stay for the selected procedure. Surgery costs include anaesthesia and standard implants. Additional fees may be charged for additional hospitalisation, further investigations and additional procedures if necessary. A brachycephalic anaesthesia supplement is c.£100.

A more accurate estimate of costs will be given at the initial consultation. Prices include VAT. If you would like an estimate for your client, for a procedure not on the list, please call to discuss.
