

Orthopaedics & Neurology Price Guide | February 2024

All surgical estimates include the initial consultation, imaging of one region and hospitalisation based on the average stay for the selected procedure. Surgery costs include anaesthesia and standard implants. Additional fees may be charged for additional hospitalisation, further investigations and additional procedures if necessary. An anaesthesia supplement of £100 applies to brachycephalic breeds.

A more accurate estimate of costs will be given at the initial consultation. Prices include VAT. If you would like an estimate for your client, for a procedure not on the list, please call to discuss.
